## EDUCATION

---

### New York University

*Bachelor of Arts in Computer Science*

- Activities: Product Management Club (PMC), Tech@NYU, Women in Computing (WiC)

New York, NY

Aug. 2025 – May 2029

## EXPERIENCE

---

### Software Development Intern

May 2026 – Present

*EBMG Property Management*

New York, NY

- Shipped **10+** features for a multi-building SaaS platform serving real paying clients by translating stakeholder requirements from EBMG's co-founders into structured, buildable specs
- Reshaped how the business routes work to vendors by designing a weighted scoring algorithm (quality, completion rate, price, timeframe) with automated **5-minute** escalation windows
- Opened a new user base and go-to-market surface by spinning out **Coop Timing Bill** as a standalone product for external brokers and attorneys with its own auth model
- Protected a prospective enterprise deal by running same-day pre-flight verification across auth, data, and AI before a live client demo — caught and fixed a billing outage before the client noticed
- Prevented user-facing harm by resolving a production security gap before it reached users and shipping a launch-day critical fix within hours of a real user's report

### Full Stack Product Engineer

Apr. 2026 – Present

*The Modern Mat Method* | [modernmatmethod.com](#)

Remote

- Shipped a product roadmap end-to-end across **7 campuses** as sole technical owner by translating informal founder asks (Slack conversations) into structured specs
- Grew a pre-launch waitlist to **50+** members by designing subscription pricing strategy: a **150-seat** founding member cap with rate-lock for early signups
- Removed engineering as a dependency for daily operations by identifying a recurring staff bottleneck and shipping a self-serve admin and instructor-training hub
- Reduced video categorization from an engineering task to a **2-minute** admin action by redesigning content operations from hardcoded categories to an admin-managed shelf model

### 3D Animation License

Jun. 2026

*Stakt*

Remote

- Retained full IP ownership and reuse rights by independently negotiating and closing a non-exclusive, perpetual licensing deal with a DTC fitness brand

### South Florida Regional President & Founder, BBGs in STEM

May 2024 – May 2025

*BBYO*

Davie, FL

- Drove measurable retention improvements across a region of **1,000+ members** by training and mentoring **17 chapter leaders**
- Recruited **30+ members** in the first year by founding an international girls-in-STEM chapter from scratch and leading weekly global discussions on AI

## PROJECTS

---

**enerME** | *2nd Place, Ruth AI Hackathon (150+ applicants)*

- Made **2M+ rows** of raw energy data legible to average users by designing a severity-based framework (low/medium/high) driving the tone of AI-generated insights

**Junio** | *Overall Winner, Girls Into VC VibeHack*

- Addressed a gap in trauma-informed prenatal fitness by designing trimester-aware onboarding and doctor-clearance gating for a real-time AI product
- Balanced product safety against a **7-hour** hackathon timeline by grounding coaching rules in **ACOG** medical guidance

## SKILLS

---

**Product & Business:** Stakeholder Management, Requirements Gathering, Contract Negotiation, Cross-Functional Collaboration, Roadmapping

**Technical:** Python, React, TypeScript, Supabase (Postgres), SQL, Stripe, REST APIs

**Tools:** Git, GitHub, Jira, Vercel

**Spoken Languages:** English (Native), Russian (Fluent), Spanish (Novice)
